

SOBAN RASHEED

Front-End & Web Developer | CS Student

sobanrasheed1@gmail.com • Faisalabad/Sahiwal, Pakistan • [LinkedIn](#) • [GitHub](#)

SUMMARY

Front-end focused CS student with hands-on experience building responsive web UIs and full-stack applications using HTML, CSS, JavaScript, and SQL. Skilled at recreating real-world product interfaces and integrating data-driven functionality with clean design. Seeking an internship to contribute to modern web products.

TECHNICAL SKILLS

Front-End	HTML5, CSS3, JavaScript (ES6+), Responsive Design, Flexbox, CSS Grid, DOM Manipulation, Animations
Back-End/DB	SQL, MySQL, JDBC, Database Design, REST API Integration
Languages	JavaScript, Python, Java, C++
Tools	Git & GitHub, VS Code, Telegram Bot API, Java Swing, PyCryptodome

PROJECTS

Spotify Web Clone | *HTML • CSS • JavaScript*

- Rebuilt Spotify's UI with sidebar, playlist view, now-playing bar, and search using CSS Flexbox/Grid and custom properties for dark theme
- Implemented play/pause, skip, seek bar, and volume controls via JavaScript DOM manipulation and Web Audio API; rendered song cards from a JSON mock library

🔗 <https://github.com/SobanRasheed/spotify-clone>

Netflix Landing Page Clone | *HTML • CSS • JavaScript*

- Recreated Netflix's landing page: hero section, horizontal scrollable carousels with hover zoom, FAQ accordion, and sticky nav using Intersection Observer API
- Mobile-first responsive layout using CSS media queries, variables, and smooth transitions — matched to original design pixel-accurately

🔗 <https://github.com/SobanRasheed/netflix-clone>

Hostel Management System | *Java • MySQL • JDBC • OOP*

- Desktop app with full CRUD for student records, room allocation, and bookings; MySQL back-end via JDBC, Java Swing UI, modular OOP architecture

🔗 <https://github.com/SobanRasheed/hostel-management-system>

Telegram AI Chatbot | *Python • Telegram Bot API • NLP*

- Intelligent chatbot with message parsing, command recognition, and contextual automated responses via Telegram Bot API integration

🔗 <https://github.com/SobanRasheed/Telegram-AI-Chatbot>

Evidence Chain Management System | *SQL • Database Design*

- Secure relational database schema for evidence lifecycle tracking with integrity constraints, foreign keys, and a complete audit trail
