WORK EXPERIENCE

Ezzstar

Full Stack Developer | 9 Months

Pakistan
Completed

- Currently building the company's social platform website using modern frontend technologies
- Developing and maintaining mobile app features alongside the web presence for the platform
- <https://ezzstar-social-website.vercel.app/>

YumQuick — Food Delivery Platform

Frontend Developer & App Developer

Norway
Completed

- Built the marketing website and a cross-platform mobile app for a food delivery startup
- Designed and developed the full user-facing experience including landing page, menu browsing, and order flow
- <https://yumquick.vercel.app/>

SELF-PROJECTS

API Gateway — Multi-Model Access Platform

Node.js • Express.js • REST API

- Building a unified API gateway that allows users to access and switch between multiple AI models through a single endpoint
- Designed a credit-based usage system with region-based routing to optimize latency and manage costs across providers
- Architected with Express.js for routing and middleware, with plans to scale into a SaaS product
- <https://chat.fennicai.tech>

DocFlow — Document Conversion App

Flutter • React • Vite • Node.js

- Built a cross-platform document conversion mobile app using Flutter that allows users to convert, compress, and manage PDF files
- Developed and self-hosted a custom file conversion engine from scratch to handle operations including PDF to Word, image to PDF, and compression
- Developed a React and Vite marketing landing page for the app, deployed on Vercel
- <https://docflowmarketing.vercel.app/>

COMSATS Guide Pro — Student Utility App

HTML • CSS • JavaScript

- Developed a student utility web app for COMSATS students with tools including a GPA calculator, course planner, and timetable builder
- Built a clean, mobile-friendly UI with multi-section navigation and persistent data storage using JavaScript
- <https://github.com/SobanRasheed/comsats-guide-pro>
