

SOBAN RASHEED

Computer Science Student | Aspiring Software Developer

 sobanrasheed1@gmail.com |  Faisalabad/Sahiwal, Pakistan | [linkedin.com/in/soban-rasheed](https://www.linkedin.com/in/soban-rasheed) | github.com/SobanRasheed

PROFESSIONAL SUMMARY

Motivated Computer Science student with a strong foundation in Object-Oriented Programming, database-driven systems, and software development. Hands-on experience building applications using Java, Python, C++, and SQL with a keen interest in AI and Web Development. Proven ability to design and implement functional solutions through academic projects including hostel management systems, AI chatbots, and evidence management platforms. Seeking internship opportunities to apply technical skills and contribute to innovative software solutions.

EDUCATION

Bachelor of Science in Computer Science

Currently Enrolled

COMSATS University Islamabad, Sahiwal Campus

TECHNICAL SKILLS

Programming Languages:

Java, Python, C++, SQL

Databases:

MySQL, JDBC, Database Design

Core Concepts:

Object-Oriented Programming, Data Structures & Algorithms, Software Engineering, Database Management

Tools & Technologies:

Git & GitHub, Java Swing, HTML & CSS, Telegram Bot APIs, PyCryptodome

ACADEMIC PROJECTS

Hostel Management System

Java • MySQL • JDBC • Object-Oriented Programming

Developed a comprehensive desktop-based application to streamline hostel operations and automate student record management processes.

- Designed and implemented full CRUD operations for managing student records, room allocation, and booking status
- Integrated MySQL database with JDBC for reliable data storage and retrieval
- Applied object-oriented design principles to create a modular and maintainable codebase
- Built user-friendly interface using Java Swing for efficient hostel administration

 github.com/SobanRasheed/hostel-management-system

Telegram AI Chatbot

Python • Telegram Bot API • Natural Language Processing

Built an intelligent chatbot capable of real-time user interaction on Telegram platform using automated logic and API integration.

- Implemented AI-powered response system for handling diverse user queries
- Developed message parsing and command recognition functionality
- Integrated Telegram Bot API for seamless communication and user engagement
- Created automated conversation flow with contextual understanding

Evidence Chain Management System

Database Design • Software Engineering • Data Integrity

Designed a secure system for recording and managing evidence lifecycle data with emphasis on data integrity and traceability.

- Architected database schema to ensure secure evidence lifecycle tracking
- Implemented data integrity constraints and validation mechanisms
- Developed structured record-keeping system with complete audit trail
- Applied database design best practices for reliable data management

ADDITIONAL INFORMATION

Languages: English (Fluent), Urdu (Native)

Areas of Interest: Artificial Intelligence, Web Development, Backend Systems, Database Architecture

Professional Qualities: Problem-solving mindset, Team-oriented, Quick learner, Strong analytical skills
